

Otras funciones de los lípidos.

1. Vitaminas liposolubles

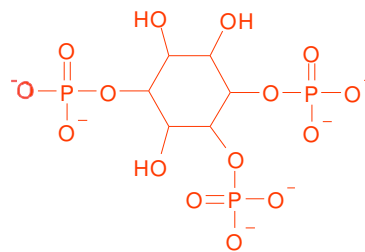

Segundos mensajeros intracelulares:

Fosfatidilinositol 4,5-bisfosfato (PIP₂)

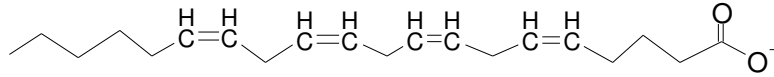

1,2 diacilglicerol
(activa la protein kinasa C)

Inositol 1,4,5-trisfosfato (InsP₃)
Estimula la liberación de Calcio desde
el retículo endoplásmico

Eicosanoides: Prostaglandinas, tromboxanos y leucotrienos:

Fosfatidilcolina, fosfatidiletanolamina

ácido araquidónico
